

# REACT ASSESSMENT 01

---

## Instructions:

- Create a react project with typescript template and name it as "Assessment01"
- Create a folder named "components" inside "src" folder and use that folder to store your components.

## Questions:

1. You are provided with a "users.ts" file with the question paper, store that file in "assets" folder inside "src" folder. It contains list of users with a lot of data, your task is to print the **name, email & city** of the **all the users** in the following format.

❖ Hello my name is **Vaibhav**, you can contact me with my email **vaibhav@gmail.com** and if you want to meet me come to **Navi Mumbai**

2. Create a form in React for the following inputs.
  - a. Name
  - b. Email
  - c. Country
  - d. State

Name and Email will be normal text input elements.

The country and state will be dropdown menus, the country dropdown will contain India and USA as the options.

- a. If you select India as country, you will see Maharashtra and Rajasthan as options in states.
- b. If you select USA as country, you will see California and Ohio as the options in states dropdown.

Once you submit the form, you must display a pop-up saying:

"Your information

Name: Vaibhav

Email: [vaibhav@gmail.com](mailto:vaibhav@gmail.com)

Country: India

State: Maharashtra

Has been stored successfully"
