Function

- Write a function named `greet` that takes a name as a parameter and prints "Hello, [name]!" to the console.
- Write a function named `average` that takes an array of numbers as an argument and returns their average.
    - Example: `average([2, 4, 6, 8, 10])` should return `6`.
- Write a function named `factorial` that takes a non-negative integer and returns its factorial.
